

TESTIMONALS

I would like to pass on the great results my customers are seeing with CleanB-sorbent and CleanB-tracks! The results they are getting are truly phenomenal. As a distributor my enthusiasm may seem biased, but the reorders and refusals to look elsewhere have me convinced that CleanB products are not only environmentally effective, but cost effective as well.

Most of my customers derive their business from cleanup of oil spills. Some of these spills are accidental and others are tank battery maintenance. Regardless the application, the areas of success in which they are most pleased are groundwater control and bioremediation. When mixed properly, the high absorption rate in conjunction with its hydrophobic nature sequesters the hydrocarbon and prevents water from washing it out. The indigenous microbes are working and significant reductions in TPH are being seen.

Thanks for all your support!

Respectfully,
